

Yerbabuena

Condominio

- Project located at the top of the Escobero Hill, is part of the municipality of El Retiro and borders the Nare nature reserve, which makes it an attractive place for those who prefer to enjoy natural spaces, the sound of water, the bird species found there and a unique environment away from the city.
- Yerbabuena is only 15 minutes from the Envigado Park, 5 minutes from El Exito in Escobero, La Salle male School and Texaco Service Station and 4 kilometers from the Escobero Toll.
- The project has the following social areas, coworking space, meeting room, kitchenette and terrace.
- Its wildlife and a forest made up of more than 3,000 species of trees are the greatest charm of this project, an ecological trail that runs through the entire complex and a space specially designed for meditation surrounded by nature.
- For the development of the project, a self-sustaining system is proposed from the construction of houses to the development of urban planning, thus we are linked with the protection of natural resources. In addition, we have carried out detailed studies that allow us to propose to the buyer the best location for their home in each lot, in order to maintain the entire ecosystem as it currently is.
- 19 lots starting from 22,335ft² and up to 84,916ft²
